We aspiration be complacent if you go in advance sand again.

Don't know if you've heard of the technique of sitting your camera on top of a bag of rice or beans to steady it when you are low to the ground.

My daughter and I went out shooting in downtown Blue Ridge Ga at sunset -- she's getting into photography and that makes me excited.

This led me to a bit of thinking about what a photo really is.

I was inside and the Katydid jumped onto a glass door, hence the good underbelly shot.

I got no further than outside the front door, where I encountered these 6 different types of moths taking naps on the wall of the cabin.

A perfect idea for photos, I thought.

Used it mostly to help bring out some detail in the darks in this fellow's clothes, and to then select the lights of the sidewalk and adjust the color and curves a bit.

I'll be back.

I used a Canon 580EX and the infrared controller that mounts on the camera, but a hot-shoe cord is a lot cheaper and perfectly fine for the small distances you will work in.

Extension tubes allow your camera and lens to come closer to an object.
