Digital camera and some spare memory cards to hold all the pictures.

I used a Canon 580EX and the infrared controller that mounts on the camera, but a hot-shoe cord is a lot cheaper and perfectly fine for the small distances you will work in.

Highland bulls, maybe Scottish Highland bulls, not quite sure.

Used it mostly to help bring out some detail in the darks in this fellow's clothes, and to then select the lights of the sidewalk and adjust the color and curves a bit.

I had forgotten some of his Photoshop advice on filters, but he just posted a little tutorial on High-Pass Filtering in Photoshop, and it's all coming back to me now.

One option is to buy a dedicated macro lens (the Canon 100mm is a good example) for a few hundred dollars, and that's all you get: a dedicated piece of glass with only one focal length and limited application.

I was inside and the Katydid jumped onto a glass door, hence the good underbelly shot.
