The advantage of luminosity masking is that it targets certain parts of the the image based on level of brightness, not specific geometry -- so you are adjusting things along a new type of dimension. Seeing a photo of the underbelly is pretty rare on the interwebs, so here's my contribution. Portable flash and controller.

Signed up for a new class starting next month at PPSOP called Stretching Your Frame of Mind, taught by Joe Baraban.

Plastic bottle and some extension tubes.

I used a small 10" hand-held reflector, but a sheet of paper would work perfectly too.

Here are some of the better (and some of the more experimental) results.

I was a bit of a purist with good reason -- still trying to learn how to use that tool called a camera.
