These mushrooms are in dark places as well as light ones, but they are down low in the shadow land, and you need a way to consistently light them up, both from above and below.

Here's a first attempt at luminosity masking of an iPhone photo.

But until then, random walk experiments continue.

I now see why.

Handheld flash, extension tubes.

Anyone want to join me in either one? ----- Recent news.

Dave Nightingale over at Chromasia.

I was able to hand-carry / pocket-carry the following: Camera and memory cards.

Did you notice the lack of tripod above? You don't need one.

For me, the change started with me putting in a darkroom at home and seeing what can be physically done to photos during the process.
