I had forgotten some of his Photoshop advice on filters, but he just posted a little tutorial on High-Pass Filtering in Photoshop, and it's all coming back to me now.

Unpacked the bags and went and looked some more, and it turns out there were all sorts of these fungi growing around -- they just started popping into my sight the more I looked and walked around.

Highland bulls, maybe Scottish Highland bulls, not quite sure.

Shot with a 70-200mm lens and a full set of Kenko extension tubes -- Was within about an inch for these shots. Digital camera and some spare memory cards to hold all the pictures.

Don't think I had the maturity or experience back in to understand this (and I certainly don't have it all now, just more of it).

Really good stuff.

It's a fantastic trick.
