Here's a first attempt at luminosity masking of an iPhone photo.

These mushrooms are in dark places as well as light ones, but they are down low in the shadow land, and you need a way to consistently light them up, both from above and below.

Handheld flash, extension tubes.

But until then, random walk experiments continue.

Anyone want to join me in either one? ----- Recent news.

I now see why.

Did you notice the lack of tripod above? You don't need one.

For me, the change started with me putting in a darkroom at home and seeing what can be physically done to photos during the process.

Dave Nightingale over at Chromasia.
