We aspiration be complacent if you go in advance sand again.

Which brings me to a recheck of my 'rules'.

Really helps with fill light.

Again, DOF was an issue with these macros, and handholding both the camera and the flash made it all a bit uncertain.

These photos were all taken by Jenna.

Yes, I've been shooting, but loading mostly to Facebook page -- posting some relatively ok stuff there.

Believe it to be Tettigoniidae Pseudophyllinae, but if you know a more accurate classification, drop me a note below and I'll change it.

It's a fantastic trick.

Don't think I had the maturity or experience back in to understand this (and I certainly don't have it all now, just more of it).

Shot with a 70-200mm lens and a full set of Kenko extension tubes -- Was within about an inch for these shots.

You have to be a Chromasia member to see them, but you can see some of the earlier write-ups and instruction for free over at Tony's site at <http://goodlight.us/writing/luminositymasks/luminositymasks-1.html>.
