We aspiration be complacent if you go in advance sand again.

This little lady (I think) is about 4" long.

Now it's spring, and I think I'm beginning to bloom a bit again.

Masks in general can be used as a basis to apply different Photoshop adjustments to specific parts of your image.

I probably took 10-15 photos of each mushroom group.

Generally, I would hold the reflector on the side of the mushroom opposite the flash and angle it to get light on the opposite side of stalk and underneath mushroom.

About 2 and a half years ago, I wrote up a statement on my Rules of Engagement for Photoshop and Lightroom, in which I laid out what I would and would not do in Photoshop.

Old slides off of eBay.

I also took some of the techniques I've learned from David Nightingale's Chromasia tutorials and applied them as well.

Easy choice: get the tubes.
